KPAX

Centralized management solutions for multi-brand compatible office printing systems

From a single interface, you can access printing devices information regardless of the number of sites, the number of customers, or the number of machines. KPAX enables the implementation of Managed Print Services (MPS) to reduce the fleet's financial & ecological operating costs, improve service quality & develop new offers.

- Independent multi-brand solution
- Meter reading automation
- Consumables management
- Monitoring of technical alerts and failures
- Statistics and activity reports
- Hardware data collection agent
- Integration with third-party software
- Easy to deploy and use

For professionals in the printing market

KPAX enables distributors and copiers OEMs to proactively track and manage the fleet of printing devices on behalf of their customers.

- Automate meter reading for invoicing
- Automatically integrate data into your ERP
- Automate the delivery of consumables
- Manage technical alerts and failures
- Produce powerful reports and develop fleet governance services

For IT managers of key accounts

KPAX allows companies, local authorities or administrations with a multi-brand/multi-vendor printing device fleet to easily track and manage all their printing and copying systems.
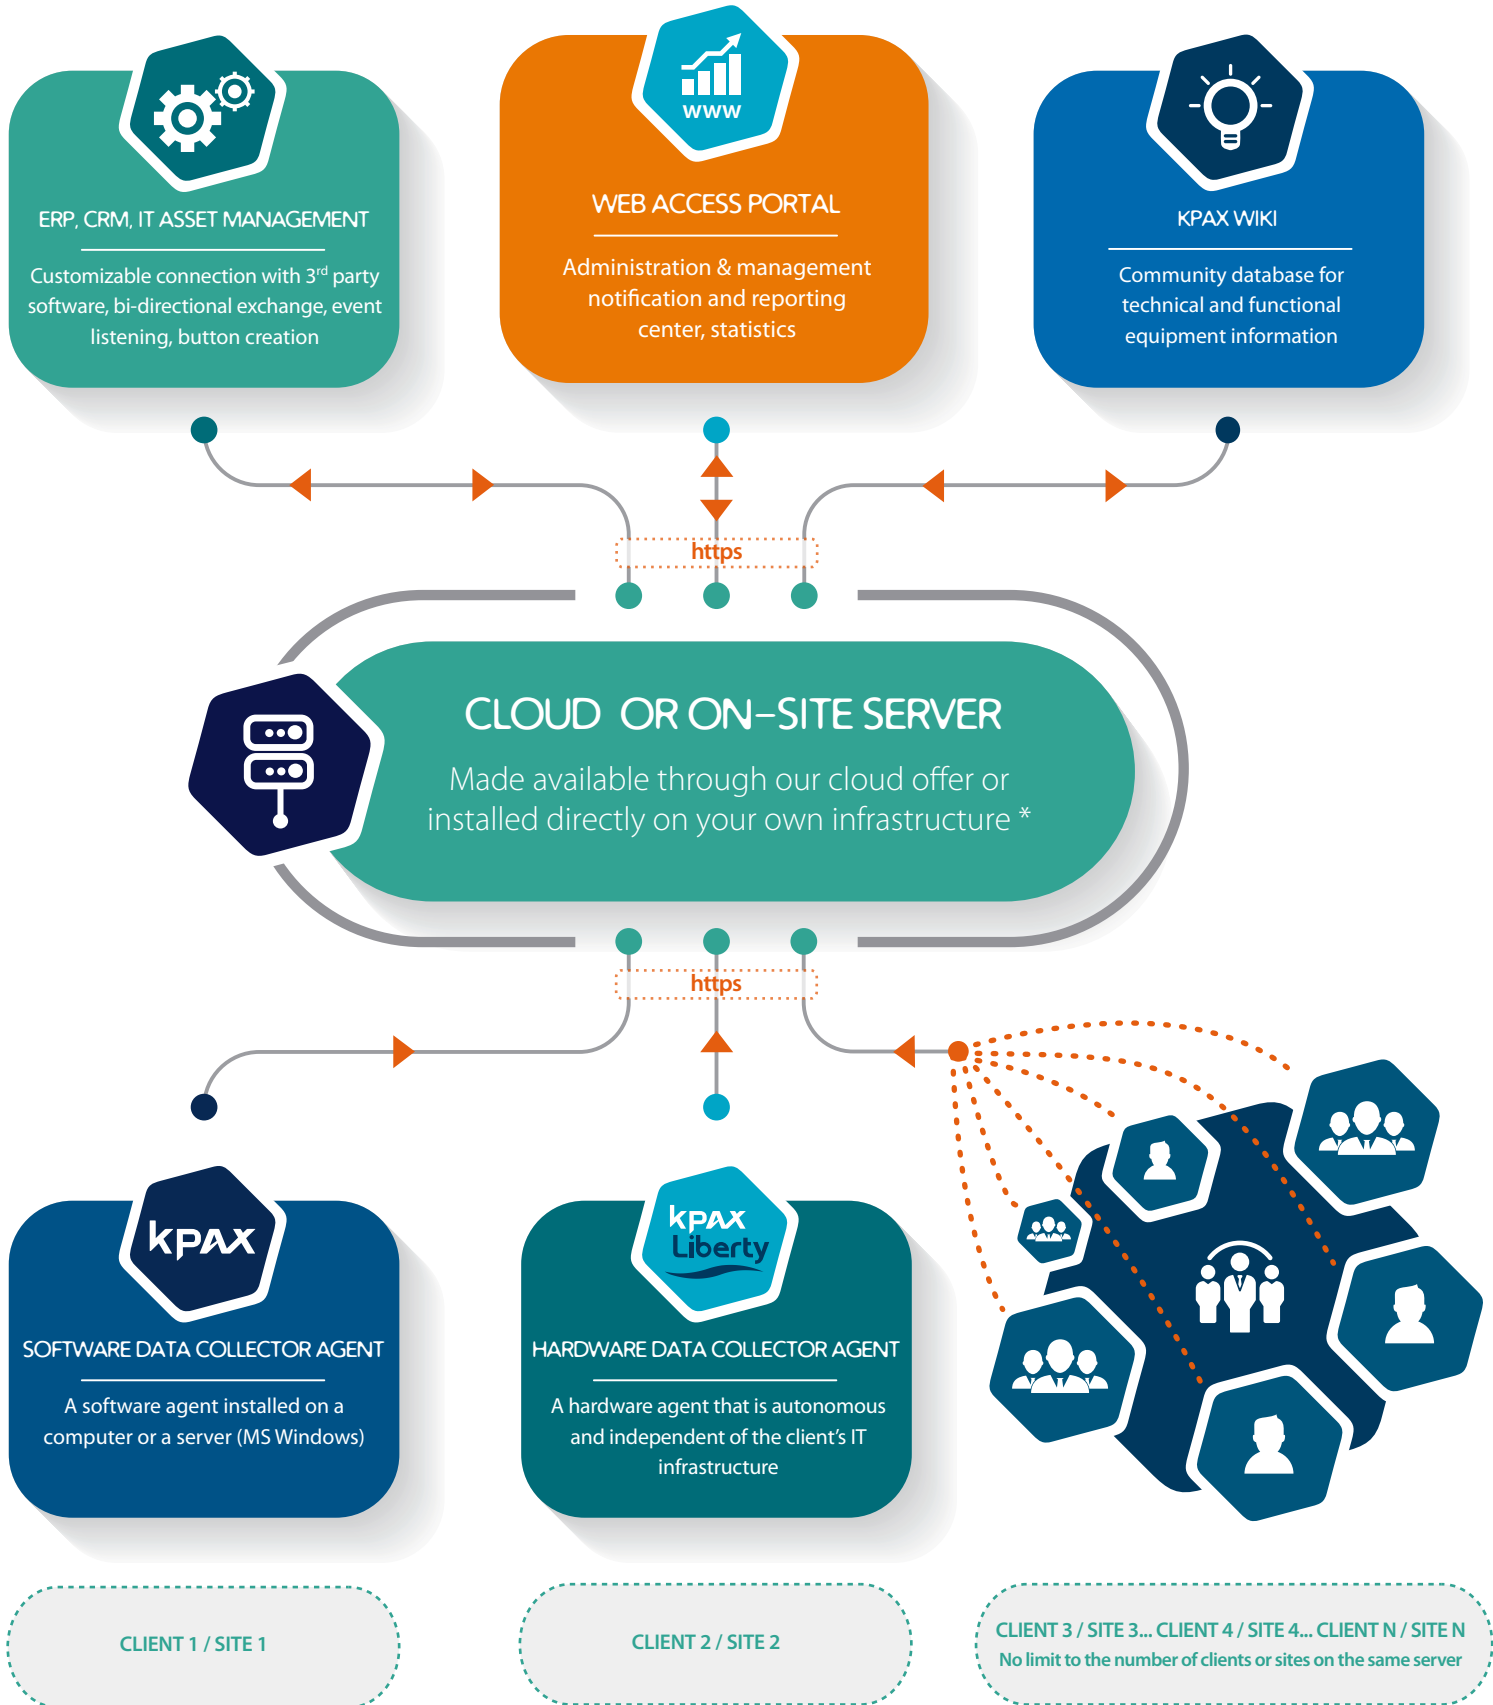

- Discover and take inventory of the fleet
- Read the meters to validate the invoicing
- Optimal management of consumables in services
- Analytical monitoring, audit, continuous optimization and fleet governance

KPAX reinvents the management of printer and multifunctional copiers

Hosting
Available in cloud or On Premise *

Credibility
10 years of experience and partnerships with most OEMs

Pricing
Pay with Koins !
Koins are a virtual currency that you use in KPAX. We designed it to meet all your needs and allow you to pay only for the data you use

Proximity
With our network of Major Valuable Partners, you benefit from a certified expert close to you

Integration
Improve your processes. KPAX is designed to develop advanced connectors with third party applications

Security
KPAX is designed to protect your information: secure hosting, encryption of sensitive data, default https

Availability
Ensure better service availability with the KPAX Liberty hardware collection agent

Principle of operation

ERP, CRM, IT ASSET MANAGEMENT

Customizable connection with 3rd party software, bi-directional exchange, event listening, button creation

WEB ACCESS PORTAL

Administration & management notification and reporting center, statistics

KPAX WIKI

Community database for technical and functional equipment information

https

CLOUD OR ON−SITE SERVER

Made available through our cloud offer or installed directly on your own infrastructure *

https

SOFTWARE DATA COLLECTOR AGENT

A software agent installed on a computer or a server (MS Windows)

HARDWARE DATA COLLECTOR AGENT

A hardware agent that is autonomous and independent of the client's IT infrastructure

CLIENT 1 / SITE 1

CLIENT 2 / SITE 2

CLIENT 3 / SITE 3... CLIENT 4 / SITE 4... CLIENT N / SITE N
No limit to the number of clients or sites on the same server

* Available soon

Liberty simplifies data collection

You spend too much time managing software collection agents!
Liberty allows you to simplify the implementation and maintenance of agents in poorly adapted client environments (no server, no workstation control, low IT competence, Mac environment...).

The Liberty stand-alone box reduces the time technicians spend managing collection agents and thus optimizes the operational costs of the technical service.

By limiting disconnections, it helps reduce travel and the carbon footprint.

| Low power supply consumption	Ethernet switch 100Mbit/s	Integrated WIFI chip	RJ45 connectivity
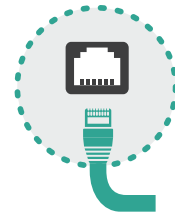

KPAX Liberty is installed on the customer's network

Only one Liberty per client network is required,
regardless of the number of devices to be managed

Liberty is not a Raspberry Pi
Beware of imitations !
• Entirely designed by the KPAX team
• Highly secure: No OS, 256-bit AES communication
• Centralized update and tracking system
• Configuration and installation from a Smartphone
• Ethernet switch to avoid mobilizing a customer socket
• Automatic network identification
• Mounting and power supply provided
• Only works with KPAX
